ABSTRACT

Data on degrees awarded in the nation and the south for 1976-1977 are presented, which is based on the Higher Education General Information Survey academic program classifications. Included in the report for the first time is an enumeration of asscciate degrees earned, by field and race. Other categories include degree completions by state, degree completions by black students, and fields of study of black students. Tables show bachelor's, master's, first professional degrees, and doctorates awarded by race and field of study for public and private institutions in the U.S., the region, and in individual states (within the region); and associate degrees and other formal awards of less than four years by field, length of curriculum, and race, in the U.S., the region and in individual states (within the region). Among findings of the report are that since 1970 the number of students receiving asscciate degrees in the south has almost doubled; that for the first time there was a decline in doctoral degrees awarded; and that while enrollment progress for Blacks has been substantial, the enrollment of Blacks is lower in the south than in the nation, despite generally higher population levels of Blacks. ## Foreword

For the first time, this SREB series on degree output includes information on completion of programs below the bachelor's level. Since the beginning of this decade, the number of students receiving associate degrees each year has almost doubled in the South, as reflected in data of the National Center for Education Statistics. The ledger on associate degrees reflects a fairly even division in two-year programs for the region as a whole, with slightly less than half of the degrees going to students in general arts and science programs and the remainder to those in occupational fields.

The data on graduate degrees show that, for the first time, the South has registered an actual decline in doctoral degrees awarded. Since the early Seventies, the nation has experienced an overall slowdown in graduate education--an adjustment to earlier overexpansion of advanced degree production relative to employment opportunities. While gradually rising levels of educational attainment are generally acclaimed with favor, the prospect of large numbers of "underemployed" advanced degree holders does pose the threat of widespread career dissatisfaction and could result in a serious waste of human resources. Thus, in spite of continuing shortages of doctorates in such fields as computer science and engineering, the general slowdown of doctorate production is not cause for alarm.

For the second consecutive year racial data are featured, with an eventual view toward development of trend information on degree of improvement in access to higher education. While levels of black freshman and sophomore enrollment in Southern institutions now generally approach black minority representation in the population as a whole (about 19 percent in the South), this is still not the case with degrees earned. Furthermore, the percentage of blacks drops dramatically, moving from the associate through the bachelor's and master's to the doctoral level. While enrollment progress has been substantial, the ultimate catch-up in degree production will take time. In first professional degrees, for example, the representation of blacks is lower in the South than in the nation, despite generally higher population levels of blacks.

Winfred L. Godwin

| Degree Completions of Black Students | 8 |
| Fields of Study of Black Students | 10 |
| Table 1: Bachelor's, Master's, and Doctorates Awarded by Race and Field for Public and Private Institutions; U.S., SREB Region, and SREB States: 1976-77 | 19 |
| Table 2: First Professional Degrees Awarded by Race and Field for Public and Private Institutions; U.S., SREB Region, and SREB States: 1976-77 | 35 |
| Table 3: Associate Degrees and Other Formal Awards of Less Than 4 Years by Field, Length of Curriculum, and Race; U.S., SREB Region, and SREB States: 1976-77 | 51 |

Degrees Awarded in the Nation and the South, 1976-77 is the fifth SREB report based on the Higher Education General Information Survey (HEGIS) academic program classifications adopted in the 1970-71 academic year.[1] Included in this year's report for the first time is an enumeration of associate degrees earned, by field and race. The discussion which follows also reviews the degree completions and fields of study of black students in the nation and the South.

Table 1 provides racial breakdowns of degrees earned in the 24 major HEGIS fields and at each level of degree. Data are displayed for public and private institutions for the United States, the SREB region, and each of the 14 SREB states. Table 2 provides the same breakdowns for the first professional fields. Table 3 presents data on associate degrees by field and race, and length of curriculum.[2]

---

[1]Previous reports in this series are entitled Degree Output in the South.

[2]Data in this report are from the computer tape of the Higher Education General Information Survey of Degrees and Other Formal Awards Conferred between July 1, 1976 and June 30, 1977. Data for the United States refers to the "aggregate United States" (50 states, District of Columbia, and outlying areas).

## DEGREE COMPLETIONS BY LEVEL: 1964-1977

Tables A, B, C, and D present historical trends in the degree production of both the nation and the South. Significant trends include:

+++ Doctorates awarded in the South declined slightly in 1977, reflecting a trend which has been evident at the national level since 1974. With a 2.4 percent national decline in the number of doctorates awarded, doctoral completions nationwide are down over 4 percent from the record high levels of 1973. This continuing national decline, compared to the stable level experienced in the South, accounts for the South's increased share of all doctorates in 1977.

+++ Master's degree recipients in the South, who have been increasing at rates in excess of 10 percent per year in the recent past, rose by only 3.4 percent in 1977. This rate of growth, however, was still double that experienced at the national level.

+++ Bachelor's degree completions continued to remain at fairly constant levels in both the region and the nation, a trend which has been observed over the last three years. About 250,000 bachelor's degrees have been awarded annually in the South since 1975.

+++ First professional degrees awarded in the South increased in 1977 by nearly 4 percent, substantially above the 2.7 percent increase at the national level.

## ASSOCIATE DEGREES

This year's report includes an analysis of associate degrees for the first time (see Table E and Table 3). There were 440,180 associate degrees and other formal awards involving curriculums of at least 2 years conferred nationwide, with 25.9 percent of these awarded in the 14 SREB states. This percentage is lower than the South's share of baccalaureate degrees (27 percent), indicative of the region's more recent development of two-year institutions. The South's share of all associate degrees has been increasing significantly in recent years, however--up over 2 percentage points from 1974 levels.

Table E

ASSOCIATE DEGREES AWARDED, BY FIELD;
UNITED STATES AND SREB STATES
1976-77

| Field | United States | | SREB States | | SREB States as Percent of U.S. |
|---|---|---|---|---|---|
| | Number | Percent of Total | Number | Percent of Total | |
| Arts and Sciences | 174,856 | 39.7 | 52,102 | 45.7 | 29.8 |
| Technologies: | | | | | |
| Data Processing | 7,993 | 1.8 | 2,062 | 1.8 | 25.8 |
| Health Sciences | 66,540 | 15.1 | 20,035 | 17.6 | 30.1 |
| Mechanical and Engineering | 49,249 | 11.2 | 11,375 | 10.0 | 23.1 |
| Natural Sciences | 15,534 | 3.5 | 2,497 | 2.2 | 16.1 |
| Business and Commerce | 87,783 | 19.9 | 17,827 | 15.6 | 20.3 |
| Public Service | 38,225 | 8.7 | 8,214 | 7.2 | 21.5 |
| Totals | 440,180 | 100.0* | 114,112 | 100.0 | 25.9 |

*Percentages in this table and subsequent ones may not add to 100 due to rounding.

Note: Includes associate degrees and other formal awards of at least 2 years but less than 4; see Table 3 for degrees and awards involving curriculums of less than 2 years.

Nationwide, about 40 percent of all associate degrees were awarded in arts and sciences, the general designation for four-year-college parallel programs at the two-year level. The remaining degree holders were divided among six broad technical fields, which, while generally viewed as terminal programs, are usually transferable in whole or in part to certain four-year degree programs (for example, Bachelor of Technology). The largest group of graduates in the technical fields can be found in the area of business and commerce (19.9 percent of the total). Health science technologies accounted for another 15.1 percent of associate degree completions in 1976-77.

General arts and science programs are relatively more important for graduates of Southern two-year programs. Nearly 46 percent of all associate degree graduates in the South received their degrees in these four-year-degree parallel fields. Distributions among the technical fields are similar to those found in the nation as a whole, with somewhat more emphasis on the health science technologies in the South and somewhat less emphasis on business and commerce.

## DEGREE COMPLETIONS BY STATE

Table F summarizes the degree completions by level for each of the SREB states and highlights the changes which have taken place since 1970-71. The rapid growth of two-year programs in both the nation and the South is readily apparent. The number of associate degrees granted annually in the South rose nearly 91 percent from 1971 to 1977. Nine of the 14 SREB states more than doubled their annual production.

The more rapid growth of graduate education in the South than in the nation during the 1970s is also evident in Table F, although there has been considerable

Note: Includes only associate degrees and other formal awards involving curriculums of at least 2 years.

variation among the SREB states. While all the states have had significant increases in the number of master's degrees awarded, some states have experienced declines in the number of doctorates awarded annually; others, substantial increases. Alabama, Arkansas, Louisiana, and North Carolina have declined from 1971 levels, while the remaining SREB states have increased, including Florida where the number of doctorates awarded in 1977 was more than double the total for 1971.

## DEGREE COMPLETIONS OF BLACK STUDENTS

The first complete and systematic accounting of degrees awarded black students was conducted for the 1975-76 academic year and again in 1976-77 by the National Center for Education Statistics. SREB's report on Degree Output in the South, 1975-76 provided racial breakdowns for the first time in this series. The discussion which follows updates that report.

In 1976-77, blacks accounted for 6.7 percent of the total associate, bachelor's, master's, first professional, and doctoral degrees awarded in the United States (see Table G). The percentage which blacks represented of all degrees was highest at the associate level (8.3 percent), lowest at the doctoral level (3.8 percent). At the baccalaureate level, blacks accounted for 6.3 percent of all bachelor's degrees received that year. Blacks made up 11.5 percent of the total population of the United States in 1975 and 10.2 percent of undergraduate enrollment in 1976. In the South, the percentage of degrees received by blacks was higher than for the nation at all levels, reflecting higher population levels of blacks (18.8 percent of total population) and the presence of predominantly black institutions in the region.

Table G

DEGREES AWARDED TO BLACK STUDENTS, BY LEVEL;
UNITED STATES AND SREB STATES
1976-77

| Level | United States | | SREB States | | South as a Percent of U.S. |
|---|---|---|---|---|---|
| | Total | Percent of All Degrees | Total | Percent of All Degrees | |
| Associate* | 36,409 | 8.3 | 12,899 | 11.4 | 35.4 |
| Bachelor's | 58,700 | 6.3 | 28,029 | 11.2 | 47.7 |
| Master's | 21,041 | 6.6 | 9,224 | 11.4 | 43.8 |
| First Professional | 2,537 | 3.9 | 748 | 4.8 | 29.5 |
| Doctorate | 1,253 | 3.8 | 322 | 4.4 | 25.9 |
| Grand Totals | 119,940 | 6.7 | 51,222 | 10.9 | 42.7 |

*Includes only associate degrees and other formal awards for curriculums of at least 2 years but less than 4 years.

The continuing importance of predominantly black institutions in producing black graduates is revealed in Table H. Predominantly black institutions awarded 39.8 percent of all degrees received by black students in the United States in the 1975-76 academic year. They also accounted for significant percentages at the master's and first professional level. For blacks in the South, the predominantly black institutions of the region continued to produce the majority of graduates. Nearly 7 of every 10 black bachelor's degree recipients in the South received their degrees from predominantly black institutions in 1975-76. This percentage is expected to decline, however, as the more rapid growth rates of black enrollment in predominantly white institutions in recent years are reflected in degree output.

Table H

DEGREES AWARDED TO BLACK STUDENTS
AT PREDOMINANTLY BLACK INSTITUTIONS,*
AND PERCENT OF ALL BLACK DEGREE RECIPIENTS;
UNITED STATES AND SREB STATES
1975-76

| | United States | | SREB States | |
|---|---|---|---|---|
| Level | Total | Percent of All Black Degrees | Total | Percent of All Black Degrees |
| Bachelor's | 23,581 | 39.8 | 19,843 | 68.6 |
| Master's | 4,971 | 24.4 | 4,265 | 47.9 |
| First Professional | 549 | 20.4 | 337 | 46.6 |
| Doctorate | 50 | 4.1 | 26 | 8.1 |

*Predominantly black institutions are those with greater than 50 percent black enrollment (Total Headcount Fall 1976).

Source: James R. Mingle, Degree Output in the South, 1975-76: Distribution by Race (Atlanta: Southern Regional Education Board, 1978).

## FIELDS OF STUDY OF BLACK STUDENTS

Bachelor's Degrees: Table J presents the level and distribution of blacks among major fields of study at the baccalaureate level. Nationwide, black representation at the baccalaureate level is highest in the fields of public affairs (9.7 percent of all graduates), education (8.9 percent), and social sciences (8.8 percent). It is lowest in the fields of agriculture (1.4 percent), theology (2.2 percent), engineering (2.8 percent), foreign languages (3.0 percent), and the physical sciences (3.1 percent). When the distribution of blacks among fields is compared to that of whites, it reveals only five fields in which blacks are more likely to enroll relative to their numbers than whites--

Table J

BACHELOR'S DEGREES AWARDED TO BLACK STUDENTS, BY FIELD;

business and management, education, psychology, public affairs, and social sciences. Similar patterns of distribution exist in the South, although the percentage of all blacks in the region receiving their degrees in the field of education (28.8 percent) is significantly higher than found for the nation as a whole.

Master's Degrees: The representation of blacks among graduates at the master's level is similar to that at the bachelor's level (see Table K), but the distribution is overwhelmingly concentrated in only a few fields. Only in the fields of education and public affairs did blacks represent close to 10 percent of the U.S. graduates in 1976-77. Blacks accounted for less than 2 percent of the graduates in the fields of agriculture, engineering, and the physical sciences. Reflecting the singularity of employment opportunities in the past, 60 percent of the black graduates at the master's level received their degrees in the field of education. If two other fields--public affairs, and business and management--are included, nearly 8 of every 10 black graduates at the master's level are accounted for. In the South, of the 9,224 master's degrees awarded blacks, nearly 3 of every 4 were in the field of education.

Doctorates: Table L presents these distributions. The 1976-77 academic year saw 1,253 blacks receive doctorates nationwide. Again, the predominance of education as a field of study is evident, accounting for 54.7 percent of all doctorates granted blacks, compared to 24.6 percent among whites. Only in two other fields--psychology, and the social sciences--did the number of doctorates received by blacks surpass one hundred. In the field of computer and information sciences, 1 doctorate was awarded nationally; in math, 10; in engineering, 23. Surprisingly, the 8 doctorates awarded blacks in the field of

architecture in 1976-77 represented 11 percent of the doctorates awarded that year. In the South, blacks received 322 doctorates, which was 4.4 percent of the total awarded. Seventy-four percent of these were in the field of education. In no other field did the number of black graduates in the South exceed 14.

First Professional Degrees: Distributions of first professional degrees among fields are shown in Table M. As noted previously, blacks accounted for 3.9 percent of the total first professional degrees granted in 1976-77. Law was the field of study for over half of the black graduates at this level (a distribution similar to whites). Medicine, in which blacks represented 5.2 percent of total M.D.s awarded, accounted for another 28 percent of the black first professional graduates. Of the major areas of study at the first professional level (those with more than a thousand annual graduates), veterinary medicine showed the greatest underrepresentation of black graduates. Blacks represented only 1.8 percent of all graduates in this field. Of the 28 graduates receiving the D.V.M. in 1976-77, all but 5 were graduates of Tuskegee Institute in Alabama.

In the South, the percentage representation of blacks in first professional fields is only slightly higher than for the nation, despite significantly larger representation in baccalaureate programs and in the population of the region. In fact, the percentage of black law graduates in the South (3.8 percent) is slightly lower than in the nation (3.9 percent).

Associate Degrees: Over 36,000 associate degrees and other formal awards involving curriculums of at least 2 years were earned by blacks in 1976-77 nationwide, accounting for 8.3 percent of all degrees at this level (see Table N). Blacks accounted for 11 percent of the two-year college enrollment

in 1976. In the South, blacks earned 11.4 percent of the associate degrees while making up 16 percent of the two-year college enrollment.

Nationwide, the distribution of blacks between four-year-college parallel programs and technical fields is quite similar. About 39 percent of both blacks and whites received their associate degrees in the arts and sciences or general programs, nationally. In the South, where levels of student enrollment in these parallel programs are higher than national levels for both blacks and whites, the percentage of blacks earning an associate degree in arts and science fields lags somewhat behind the percentage of whites.

Table 3 (p. 51) reveals that the percentage representation of blacks in programs involving curriculums of less than two years is substantially higher in the South than the representation found in programs of at least two years. Blacks accounted for 21 percent of the degrees and awards earned in the shorter programs, compared to the 11 percent in the programs involving curriculums of 2 or more years. These differences are not evident at the national level, however.
